Hi Pat,

I see you're back on the hook for Quant I in the fall... 😊

Here are all of my materials from this past fall (syllabus, lectures, problem sets, exams):

<https://www.dropbox.com/s/vctltrwqdx18m48/Quant%20I%20Fall%202012.zip>

You obviously have all of your own materials. Thank you again a thousand times for sharing those! You'll see that I've drawn on them a whole bunch.

But I figured this might still be useful, in case you're looking for additional material, new problems, etc.

For the lectures, the versions with "print" in the name are what I distributed to students and showed in class. The non-print versions are what I had to look at in class. There are also some additional notes and comments only in the tex-files.

I've also added you as a guest user to the Blackboard site, so you can see all of the lab files.

Let's get together sometime soon!

Best,
Bernd
